EXECUTIVE SUMMARY

An analytical cybersecurity researcher and a Final year student in the Department of Computer Science with a strong focus on Security Operations Center (SOC) operations, incident response, and threat detection. Proficient in developing low-level network tools using C++ and Python, and highly experienced in Linux-based environments for security research. Has demonstrated proficiency in academic research, collaborative software development, and leadership within organizations, with a strong interest in exploring Artificial Intelligence, cybersecurity risk management, and security auditing.

FORMAL EDUCATION

Undergraduate of Informatics, 3.70/4.00

Aug 2024 – Aug 2027

President University – North Cikarang, Bekasi Regency

- Relevant Coursework: Ethical Hacking, Network Security, Cryptography, Operating Systems, Data Structures & Algorithms, Digital Forensics, Artificial Intelligence.
- Served as the member of President University Faculty Association of Computer Science 2025
- etc

AREA OF EXPERTISE

- **Database & DevOps:** MySQL, MongoDB, SQLite, Firebase
- **Security Operations (Blue Team):** Wazuh (SIEM), Log Analysis, VirusTotal, NetworkMiner, Wireshark, Firewalls, Network Analysis
- **Offensive Security (Red Team):** Active Directory Pentesting, Nmap, Burp Suite
- **Forensics:** Malware Autopsy, Autopsy (Forensics Tools), FTK Imager
- **Networking & OS Administration:** Network Packet Capture (libtins), Port Scanning, VPNs, Windows Administration, Linux Administration
- **Security Frameworks & Methodologies:** ISO 27001, NIST SP 800-30 Rev. 1, Octave Allegro
- **AI & Machine Learning:** Random Forest (applied in IDS), Systematic Research on AI in Cybersecurity, AI for Predictive Maintenance (IoT & ML), Natural Language Processing (Data Redaction), Computer Vision (Anomaly Detection)
- **Programming & Automation:** Python, JavaScript (Node.js, ReactJS, Next.js), PHP, HTML, CSS

LATEST PROJECTS & SETUP

- **Project (December 2025): Supervised & Unsupervised Machine Learning** – Applying Scikit-Learn to develop predictive models (SVM, KNN) for classifying student performance and applying K-Means clustering for customer behavior segmentation
- **Project (April - May 2026):Eco Resilient Logistics AI** – AI-Powered Logistics Intelligence Platform for Predictive Routing and Carbon Tracking.
- **Project (February 2026): IDS Machine Learning** – Comprehensive Intrusion Detection System (IDS) with Machine Learning capabilities
- **Setup (February 2026): Wazuh SIEM tools** – Deployed and configured a Wazuh Security Information and Event Management (SIEM) environment on Linux distributions
- **Project (April 2026): Network Traffic Auditing Lab** – Conducted comprehensive network sniffing and packet analysis using Wireshark and Network Miner
- **Project (June 2026): Portfolio Website** – Developing a responsive, interactive portfolio website using React, Vite, and Framer Motion to dynamically showcase technical projects and professional achievements.
- **Project (Ongoing): PapiKost** – Served as Project Manager for a full-stack boarding house management application built with Next.js and Prisma ORM that integrates billing automation, room management, and real-time repair tracking.
- **Project (Ongoing): Post Quantum Cryptography and Dark Network** – Developing a Dark Network Mesh and VPN infrastructure based on Post-Quantum Cryptography (PQC) using C++ in a Linux environment to mitigate quantum security threats through hybrid cryptographic algorithms and crypto-agility.
- etc

ORGANIZATIONAL EXPERIENCES

Member – PUFA Computer Science 2025

Oct 2024 – Aug 2025

- Part of External Relation Division
- Manage to be Project Manager In Comparative Study President University With Universitas Gadjah Mada
- Being Committee and PIC at 6 events under President University Student Council And PUFA Computer Science

Website Developer – Karawang Education Fair 2025

Jun 2024 – Feb 2025

- Developed and maintained KEF ticketing website using Laravel
- Reach 5.000 buyers via website

Website Developer –Karawang Education Fair 2026

Jun 2025 – Feb 2026

- Developed and maintained KEF ticketing website using Next.js
- Reach 7.000 buyers via website

Event Organizer – Grand Inauguration 2026

Jun 2025 – Oct 2025

- Manage the largest event from PUSC 2025
- Attended by more than 1,200 people
- Achieve member of the month July edition
- Manage and coordinate the event without any major problem

CERTIFICATIONS

Introduction to Cybersecurity

July 2026

Cisco Network Academy

Cybersecurity Career Starter Certification

May 2026

Hack & Fix

Samsung Innovation Campus Batch 7

Nov 2025

Dibimbing Academy

Responsive Web Design

June 2024

FreeCodeCamp

ADDITIONAL SKILLS, TRAININGS & ACHIEVEMENTS

Languages: Indonesia – Native, English – *Fluent*

Achievements:

- 6th Place - President University CTF Batch 2024: Ethical Hacking Oct 2025
- 4th Place - President University CTF Batch 2024: Digital Forensics Apr 2026
